

ARCHIE LOCKS & 3 POINT KITS

STAINLESS STEEL COMPONENTRY

- All 3 pt kits face plates are s/steel. Std range are p/coated black. For High Strength , face plates are in natural finish
- All High Strength 3 pt kits , the bolts , beaks , strikers , keepers are all s/steel for Sliding and Hinge Locks
- Hinge Locks : Face plate is s/steel & powdercoated in Black.
Sliding Locks : Face plate is steel powdercoated in Black.
Internal bolts , etc are Zinc die casted
- All lock bodies are pressed steel for additional strength , not Zinc die casted
- All High Strength main locks face plates are S/Steel in natural finish. Bolts , beaks , strikers , keepers are all S/Steel
- Short lock screws are all S/Steel to help avoid any future maintenance issues. We recommend to drill a small pilot hole prior to screwing & tightening up
- S/Steel standard security door " Hinges " in natural or black finish
