CDK Pet Mesh "PLUS"

THE NEXT GENERATION IN PET MESH

COMBINING THE POSITIVE FEATURES OF PET PROOF MESH AND FIBREGLASS INSECT MESH...

"The strength of Pet proof mesh PLUS the smaller holes of Fibreglass insect mesh"

Specification:

Colour: Charcoal

Material: Dacron coating over polyester yarn

Tensile Strength: 630 N (Test method ISO 13934-1-1999)

Suitable for use in DOORS, WINDOWS AND SCREEN ENCLOSURES.

CODE	ROLL WIDTH	ROLL LENGTH
GP161609	0.91m	30m
GP161612	1.22m	30m
GP161615	1.52m	30m
GP161618	1.83m	30m
GP161621	2.13m	30m

This product's feature is its high strength when compared to standard fibreglass insect screening while still maintaining great visibility and airflow, exceptional durability and its ease to install and low maintenance.

Perfect for doors, windows and screen enclosures without the bulkiness of the heavier pet proof mesh.

It is ideal for our harsh Australian conditions and our little Aussie terrors...cats, dogs and kids.

LOOKS LIKE STANDARD MESH BUT RETAINS THE STRENGTH OF PET PROOF MESH.
